Languages: Bangla (native) · English (professional) · Hindi (conversational)

PROFESSIONAL SUMMARY

Computer Science & Engineering graduate and practising software engineer, applying for the post of **Assistant Programmer**. Holder of a **B.Sc. in Computer Science & Engineering from IUBAT** (degree certificate issued 30 May 2024) and a **Python-Django certification issued by EDGE, the Enhancing Digital Government and Economy programme of the ICT Division, Government of Bangladesh** (22 July 2025). Currently **Senior Python Executive at Softvence Agency**, promoted from Junior Python Developer within eleven months, with two years of production experience in application development, **relational database design and administration**, REST API development, Linux server operation and system documentation. Formally trained in the software development life cycle — requirement analysis, ERDs, data-flow diagrams, cost estimation and feasibility assessment — and experienced in preparing technical documentation and user guides to a standard suitable for institutional handover.

EDUCATION

B.Sc. in Computer Science & Engineering (BCSE)

May 2020 – Jun 2024

IUBAT — International University of Business Agriculture and Technology, Dhaka · Department of Computer Science & Engineering

- **CGPA 3.59 out of 4.00**. Date of admission 20 May 2020; date of completion 30 June 2024; **degree certificate issued 30 May 2024**.
- **Thesis: Implementation of Parallel Data Transmission in Li-Fi Technology by Using RGB Light** — research and a working Arduino prototype encoding three bits per symbol in parallel across RGB colour channels, with performance evaluation under varying ambient-light conditions.
- **Practicum project: Development of Internet Service Provider System** — a role-based management platform for ISP operations (PHP, MySQL, Bootstrap 5) covering customer and employee records, payment tracking with invoice generation, and task assignment.
- **Relevant coursework:** Data Structures & Algorithms · Database Management Systems · Operating Systems · Software Engineering · Computer Networks · Compiler Design · Computer Graphics · Object-Oriented Programming.

Higher Secondary Certificate (HSC), Science

Jun 2017 – Apr 2019

Dhaka Udyan Government College · GPA 3.17 out of 5.00

Secondary School Certificate (SSC), Science

Jan 2014 – Apr 2017

Ibn Taymiyyah School and College · GPA 4.68 out of 5.00

CERTIFICATIONS

Python-Django — EDGE, Enhancing Digital Government and Economy, ICT Division, Government of the People's Republic of Bangladesh · issued **22 July 2025**

Internship Certificate — Cyber Hundred · issued **5 June 2024**

B.Sc. in Computer Science & Engineering — IUBAT · certificate issued **30 May 2024**

TECHNICAL SKILLS

Programming languages: Python (primary) · SQL · JavaScript / TypeScript · PHP · C · C++ · C# / .NET 6 · Java · HTML5 / CSS3 · Bash shell scripting

Database management: PostgreSQL · MySQL · SQLite · Redis · database design and normalisation · entity-relationship (ER) modelling · SQL query writing and optimisation · indexing · migrations · backup and restore · pgAdmin and phpMyAdmin administration

Application development: Django 5.2 · Django REST Framework · FastAPI · REST API development · authentication and authorisation (JWT, OAuth 2.0, OTP, two-factor) · role-based access control · background job scheduling with Celery · report and document generation

Systems & infrastructure: Linux server administration · Docker and Docker Compose · Nginx · Caddy · AWS EC2, IAM, S3, SES, RDS · VPS provisioning · SSH key management · system backups · health monitoring and structured logging · Git and GitHub version control

Software engineering process: Requirement analysis and elicitation · functional and non-functional requirement specification · use case, activity and swimlane diagrams · ERDs · data-flow diagrams to level 4 · function-point estimation · cost estimation · feasibility assessment · risk assessment and RMMM planning · SDLC methodologies · technical writing and user documentation

Hardware & embedded: Arduino and ESP8266 microcontrollers · sensor interfacing · Li-Fi / optical wireless communication research · power electronics and prototyping

Office & tools: MS Office · VS Code · PyCharm · Visual Studio · NetBeans · Postman and Bruno API testing · Swagger / OpenAPI documentation

WORK EXPERIENCE

Senior Python Executive — Softvence Agency

Aug 2025 – Present

Level 3/15, Ambon Complex, 99 Mohakhali C/A, Dhaka-1212 · Full-time, on-site · Promoted from Junior Python Developer in July 2026

- **Designed, developed and deployed eight production application backends in eleven months** — four on Django REST Framework and four on FastAPI — taking each from database design and API specification through containerisation, automated deployment and documented handover.
- **Designed and administered the relational databases** behind those systems — PostgreSQL and MySQL schema design, normalisation, constraints and indexing, migration management, query optimisation and backup procedures.
- **Prepared formal system design documentation** as a client deliverable: requirement analysis, numbered functional and non-functional requirement tables, use case, activity, swimlane and ER diagrams, data-flow diagrams, function-point and cost estimation, feasibility assessment and an RMMM risk plan.
- **Operated Linux servers in production** — provisioning on AWS EC2 and VPS hosts, Docker deployment behind Nginx and Caddy, SSH key and access management, system backups, and live health monitoring of database, cache, mail and background-worker services.
- **Authored the reusable application foundation adopted as the organisation's baseline** (authentication, one-time-password verification, scheduled email, structured logging, health dashboard, containerisation, automated deployment), reducing setup time for each new project from days to hours.
- **Wrote user-facing and operational documentation**, including a six-chapter plain-language operations guide enabling a non-technical owner to run and maintain a three-service system independently.

Web Development Intern — Cyber Hundred

Feb 2024 – Jul 2024

Adapt F/K Complex, Kuratoli, Khilkhet, Dhaka · On-site internship · Certificate issued 5 June 2024

- Developed and maintained frontend and backend features using HTML5, CSS, Bootstrap, PHP and MySQL across multiple client web projects; managed databases and optimised queries through phpMyAdmin; documented project workflows and prepared technical reports; applied Git and GitHub for version control.

SELECTED PROJECTS

Internet Service Provider Management System · academic practicum

Jan 2024 – Jul 2024

PHP · MySQL · Bootstrap 5

- Role-based platform for administrators, employees and customers covering record management, **payment tracking with invoice generation**, task assignment and service tracking, with a dashboard of operational metrics.
- Delivered with the full academic documentation set — requirement specification, ER diagram, data-flow diagrams and a mobile-responsive interface — and accepted as the practicum requirement of the B.Sc. programme.

Hospital Management System · database design

Feb 2025

MySQL · SQL · ER modelling

- Normalised database schema for patients, doctors, appointments, treatments and billing, delivered as a documented entity-relationship diagram and a runnable SQL schema script.

Personal Assets Management System · self-directed

Apr 2025 – Present

Django · MySQL · Django REST Framework

- Financial management system with administrator and user roles that tracks income sources and asset classes, **calculates zakat against the nisab threshold and tax obligations automatically**, stores proof documents against every record, and issues due-date alerts.

Real-Time Chat System · self-directed

Aug 2025

Django 5 · Django Channels · Daphne ASGI · Redis channel layer · Bootstrap 5

- Multi-room real-time messaging over WebSockets with authenticated connections, group broadcast to every member of a room, and a responsive interface — the same architecture a live status or notification dashboard requires.

Also built — **SafeTag**, a complete nine-chapter system design document for a real-time emergency evacuation platform (feasibility study, requirement engineering, ERD and data-flow diagrams, function-point and cost estimation, RMMM risk plan) · an ESP8266 IoT platform exposing a built-in web interface over Wi-Fi for remote device control and live sensor monitoring · 27 public repositories spanning Python, C++, PHP, SQL and embedded C. **References available on request.**
